Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a tire anti-puncture device comprising at least two layers of woven fabric, each layer having a taped fiber density of at least about 80% and formed of fibers having a tenacity of less than about 15 grams per denier (claims 1-8, 12-14, 17, 19-21, and 23-26)
- a tire anti-puncture device comprising a woven fabric having a round packed cover factor of at least about 40% in the warp and at least about 65% in the full and formed of fibers having a tenacity of less than about 15 grams per denier (claims 27-31, 33, 35, 36, 40-44, 47-52)
- a tire anti-puncture device comprising at least two layers of fabric, each layer having a bulk density that is at least about 20% of the density of the fabric forming fibers and formed of fibers having a tenacity of less than about 15 grams per denier (claim 53)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 1733

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. A telephone call was made to Vernon Maine on September 10, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Justin R Fischer** whose telephone number is **(703) 605-4397**. The examiner can normally be reached on M-F (7:30-4:00).
